SHORE

In today's digital world, it is more critical than ever for organizations and individuals to maximize their productivity, efficiency, and use of time. To thrive in this digital disruption race and stay ahead of competition, one must deploy smart end-to-end workflows in their business models to deliver enhanced customer experience and ensure business growth.

About SHORE

SHORE is a one-stop solution for smart workflows, designed to support the digital journey by moving away from paper, old file systems and other outdated technologies. SHORE is fully customizable, designed to work the way you do, finding efficiencies along the way for continual improvement.

Features

- Unmatched flexibility with customizable forms to suit your business needs
- Track performance and progress at organization, department and individual level using smart dashboards
- Audit trail for complete transparency and accuracy in your workflows
- Dynamic notifications to keep you updated on the tasks and project status
- Comprehensive reporting options for better and quick decision making
- Data security architecture to ensure your data privacy is secured
- Bulk upload and update feature for processing massive data in a fraction of time
- Process automation to make your work faster, easier, and more consistent

Benefits

- Increased productivity
- Reduced operations and overall business cost
- Quick fix to your process and employee inefficiencies
- Increased transparency in process bottlenecks
- Reduced risk of human error and its associated costs
- Enhanced customer experience
- More time to dedicate to high value work
- Shift focus and resources on business growth

Our Happy Customer

“As an avid user of SHORE created by IndustrialWebApps, I can confidently say that it has revolutionized the way I manage and organize data. With the software, I can quickly search and retrieve important information, which has saved our company countless hours of manual data entry and analysis.

I would highly recommend contacting IndustrialWebApps for anyone looking for an efficient and effective way to manage data. It has truly transformed the way I do business, and I cannot imagine going back to the old manual methods of data management.”

Ken Barrett, President
