EQUIPMENT & INVENTORY TRACKER

In today's ever evolving industry, the spectrum of inventory management – from procurement to servicing and leasing can be daunting, especially when tied to antiquated paper-based systems. To thrive in this digital disruption race and stay ahead of the competition, it's imperative to embrace cutting-edge solutions for inventory management within your business model. SaaS will ensure impeccable traceability, unmatched availability, and total transparency in inventory management while delivering an enhanced customer experience.

About SHORE - Inventory & Equipment Tracking System

Discover the future of industrial equipment management with SHORE's *Inventory & Equipment Tracking System*. Say goodbye to woes of manual work and embrace a paperless future with our cutting-edge SaaS solution, revolutionizing your inventory management process. You can now Effortlessly monitor equipment availability, conduct quality checks, and manage services, all in one place, providing you with complete control at your fingertips. Experience a seamless inventory tracking process like never before with SHORE's *Inventory & Equipment Tracking System*.

Features

- QR Code scanning for quick access to detailed information and updates on inventory/equipment
- Real-time monitoring of equipment availability, location, and working condition for improved control and enhanced decision-making
- Personalized dashboards to display critical data and insights for efficient monitoring
- Documents tracking to keep tab on calibration/user manual/warranty information
- Intuitive, user-friendly interface for easy access from any device, anywhere
- Cloud-Based Storage with multi-factor authentication and access control to securely store data in the cloud, ensuring easy accessibility and data backup
- Mobile accessibility for field crew to manage inventory on-the-go
- Scheduled maintenance ensures compliance with industry regulations and standards

Benefits

- Easy mobile access for on-the-go inventory management
- Effortlessly bulk load equipments list with all the necessary details
- Real-time information on the tasks and inventory status with dynamic notifications
- Improved operational efficiency with insights on inventory levels, sales performance, and customer buying behaviour
- Informed decisions with data-driven insights available on comprehensive dashboard
- Reduced risk of human error and its associated costs
- Reduced operations and overall business cost with paperless process
- Enhanced transparency in identifying process bottlenecks and reduce downtime
- Assured Quality standards with timely information on quality checks, servicing, replacements, and upgrades

Our Happy Customer

“As an avid user of SHORE created by IndustrialWebApps, I can confidently say that it has revolutionized the way I manage and organize data. With the software, I can quickly search and retrieve important information, which has saved our company countless hours of manual data entry and analysis.

I would highly recommend contacting IndustrialWebApps for anyone looking for an efficient and effective way to manage data. It has truly transformed the way I do business, and I cannot imagine going back to the old manual methods of data management.”

Ken Barrett,
President Wolverine Manufacturing
